- Helped mitigate and resolve issues by analyzing situation and implementing appropriate solutions.
- Managed team members and delegated tasks effectively.
- Provided regular feedback to team members on their performance.
- Fostered positive work environment to encourage productivity.

BRANDON THOMPSON

DATA/MATHS STUDENT

TO WHOM IT MAY CONCERN,

My name is Brandon and I'm contacting you today because I KNOW that I would be a perfect fit for your team! I am an extremely quick learner and diligent worker and can become one of your top employees in no time. Now I don't just say this lightly, but from actual experience working in a wide variety of fields. Not only do I assimilate quite easily, but in a short amount of time, will excel. I take pride in the work I do and the image I portray, hopefully inspiring others along the way. When I am tasked with a problem, I stay focused until that problem is solved – from start to finish. Accuracy and efficiency are my top priorities; however I am able to adjust according to the task at hand. I have a passion for knowledge and have no issue asking questions - I will always get to the bottom of any situation. I confident I can consistently excel because of my physical/social awareness and attention to detail. I can often solve a problem before it even arises - often saving headaches and, more importantly, money. Basically, I'm a research nut. I genuinely enjoy learning and knowledge is something I always strive to constantly attain. There have been many situations where I lacked the relevant know-how for a specific task and had to learn new skills on the fly. This, is where I thrive. I have 110% confidence in my ability to complete my job efficiently while exceeding expectations. My goal is to instill that same trust in you! I have a wealthy amount of experience with jobs in a wide range of different industries, and have seen it all. I am flexible and adaptable - able to work both independently and with a team. I will not disappoint!

I have a few years of self-taught experience with software such as Microsoft Excel and Google Sheets, and some experience using python and SQL for various projects (you can find some of my projects on my website). However, I have recently decided to return to school to complete a degree in Mathematics. My goal is to leverage mathematics in the finance industry, where I hope to use my skills to generate profit in certain financial markets. But this... this is just the beginning. The end goal would be to run my own hedge fund. So that brings us here! I'm contacting you because I know I have what it takes to make us both a lot of money. I have extensive knowledge with automobiles, and I'm super friendly and personable. I've run a few online businesses myself so I'm familiar with the ins and outs of creating great deals and solving people's problems. At the moment, I'm looking for a part time position on the weekends as I acquired an early internship which I am at during half the week. Due to some unfortunate circumstances I wasn't able to get into school this semester, which is why I am looking to maximize the use of my free time. I am also free on Monday and Tuesday if absolutely necessary but I would prefer to have those off. I am also able to acquire a VSA license if a position is offered. If you are looking for a new salesperson, I would love to speak with you! I'm sure we will find that we can really benefit each other greatly. You can reach me at (236) 866-3944, but I am most easily reached by email at bthompson_1@outlook.com. I look forward to hearing from you!

SINCERELY,

BRANDON THOMPSON
